DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-60 are rejected under 35 USC 112 first paragraph as failing to comply with written description requirement.

Regarding independent claims 1, 14, 19, 32, 45, 53, and 59-60, on lines 9-10, claim recite " if the set of candidate string for current pixel is empty, selecting candidate string from the previous current pixel". From the specification it is not clear what applicant mean by if the set of candidate string for current pixel is "empty" and what is the criteria for selecting candidate string from the previous current pixel. Which previous current pixel's candidate string is selected to match with current pixel. Claims 2-13, 15-18, 20-31, 33-44, 46-52 and 54-58 are dependent on claims 1, 14, 19, 32, 45 and 53 therefore they are also rejected.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-60 are rejected under 35 USC 112 second paragraph as being indefinite.

Regarding independent claims 1, 14, 19, 32, 45, 53, and 59-60, on lines 7-8, claim recite “each candidate string approximately matching the corresponding image string” and on lines 9-10, claim recite “if the set of candidate string for current pixel is empty, selecting candidate string from the previous current pixel”. These limitations of claim language are conflicting because if each candidate string approximately matching the corresponding image string then how candidate string for current pixel is empty and there is no match. Claims 2-13, 15-18, 20-31, 33-44, 46-52 and 54-58 are dependent on claims 1, 14, 19, 32, 45 and 53 therefore they are also rejected.
